

Bootstrap

UVic Web Development & Design Club

github.com/amyhanv/bootstrap-workshop

What is it?

Bootstrap is an open source toolkit for developing with HTML, CSS, and JS. Quickly prototype your ideas or build your entire app with our Sass variables and mixins, responsive grid system, extensive prebuilt components...

Head to getbootstrap.com to read more

Using it

<https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css>

Or Head to getbootstrap.com/docs/3.3/ to download the files

:)

Demo html file if you don't have one to Bootstrap:

github.com/amyhanv/bootstrap-workshop

Shit 2 know

Some basic shit:

- ★ Mobile First Layout
- ★ Containers
- ★ Columns / rows
- ★ Navbar
- ★ Buttons

The Grid

3 equal-width columns starting at desktops & scaling to large desktops

<code>.col-md-4</code>	<code>.col-md-4</code>	<code>.col-md-4</code>
------------------------	------------------------	------------------------

2 columns of different widths

<code>.col-md-8</code>	<code>.col-md-4</code>
------------------------	------------------------

Try it out

DO it fools

Conclusion

Bootstrap allows you to make your web pages really quickly and easily because it provides you with CSS classes and other layouts and elements that you can use on your pages!!!

Questions or concerns?

See ya

Same place same time
